FMG INC. / GETCHELL MINE

DEWATERING DRILLING PROGRAM - SOUTH PIT

FMG desires to dewater the Getchell South Pit by the use of dewatering wells. To accomplish this task, FMG proposes a drilling program to locate three or four wells, which when used together, will be capable of dewatering the pit. The drilling program will be conducted at the direction of Brown & Root (FMG's Mining Contractor) however, a licensed State Water Driller will be overseeing the entire drilling program.

We realize that locating the wells will be difficult. Brown & Root have committed to drill up to 10 exploration holes in hopes of finding the three or four well locations needed.

As each successful well is located, FMG will submit an amendment to the State Department of Water Resources giving the exact location of the new point of diversion. At the conclusion of the drilling program, FMG will submit, to the State Department of Water Resources, an amendment to this Application which will include a map showing the exact locations of each dewatering well.
